I would like to suggest that FOC have custodial and non custodial parents provide a PHYSICAL address for their residence and not accept PO BOX addresses. A majority of issues in tracking down parents is that no one knows where they live, well if they can simply give a PO BOX somewhere this doesn't help.

Additionally when parents are ordered NO CONTACT with the child the custodial parent should have the right to know where the non -custodial parent is residing in order to protect the child from where this person is and to know whether she has possibly moved closer and is in the vicinity of the child residence.
